USER'S GUIDELINES FOR ASSETS MAINTENANCE

3. Report any issues: If visitors notice any issues with cleanliness in public buildings, such as spills, overflowing trash cans, or other facility-related problems, they should report them to the facility staff or maintenance team.

4. Be mindful of food and drinks: Visitors should not bring food and drinks into areas where it is not allowed

5. Respect the cleanliness policies: Many public buildings have certain policies in place to maintain cleanliness, such as no smoking, no pets allowed, and no spitting.

6. Strict use of conveniences according to gender purposes.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Here are some examples of right and wrong behavior in using toilets in public buildings:

	Right Behaviour		Wrong Behaviour
1	1. Use the toilets for their intended purpose.		Engage in illegal or prohibited activities in the toilets.
2	Flush the toilet after use.	2	Vandalize or damage the toilets or its property.
3	Use toilet paper and dispose of it in the designated bin or toilet bowl.	3	Block or damage the toilets or its facilities, such as the drains or pipes.
4	Use soap and water to wash your hands thoroughly after using the toilet.	4	Leave the toilet unflushed or leave litter inside.
5	Use towels or hand dryers to dry your hands.	5	Leave the toilet unflushed or leave litter inside.
6	Respect the privacy of other users.	6	Engage in aggressive or threatening behavior towards other users.
7	Report any maintenance or safety issues to the appropriate authorities.	7	Spend excessive time or loiter in the toilet.

INTRODUCTION, OBJECTIVES & SCOPE

This manual provides comprehensive guidelines for the efficient maintenance of public buildings. Its primary purpose is to ensure the safety, functionality, and longevity of these facilities by outlining essential maintenance tasks and procedures.

The manual is targeted towards facility managers, maintenance staff, and related personnel responsible for the upkeep of public buildings.

This guideline applies to all Federal Ministries, Departments, and Agencies (MDAs) that occupy, manage, or operate public buildings, facilities, and assets.

INTRODUCTION, OBJECTIVES & SCOPE

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

LEGAL & INSTITUTIONAL POLICY FRAMEWORK

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

MAINTENANCE CATEGORIES

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

MAINTENANCE CATEGORIES

Routine/Minor Maintenance (handled by MDA maintenance units)

- Cleaning, painting, pest control.
- Basic plumbing/electrical repairs.
- Replacement of consumables (bulbs, filters, locks).

Major Maintenance (must be reported to FPAM)

- Structural works (roof, foundation, walls).
- Mechanical/electrical system upgrades (HVAC, power, water systems).
- Renovations, refurbishments, and modernization projects.
- Safety compliance upgrades (fire systems, accessibility features).

USER'S GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

FPAM FEDERAL PUBLIC ASSETS MAINTENANCE DEPARTMENT

PUBLIC ASSETS MAINTENANCE MANUAL

UNITY AND FAITH, PEACE AND PROGRESS

fpam@fmhud.gov.ng
https://assets-fpamd.org

LEGAL & INSTITUTIONAL POLICY FRAMEWORK

In line with the **National Public Buildings Maintenance Policy** and the provisions of **Executive Order 11** on the Institutionalization of the National Maintenance Culture/economy, the Federal Public Assets Maintenance (FPAM) Department of the Federal Ministry of Housing and Urban Development has been mandated to take the lead responsibility in the coordination, regulation, and execution of major maintenance works on federal public buildings and assets across all MDAs. This responsibility also involves creating a framework to oversee compliance, capacity training, and asset management of public buildings across all MDAs.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Proper use of Public facilities:- By respecting rules and regulations in public buildings, we can help maintain a safe and secure environment for all. It is important to read and follow posted signs, ask for permission when necessary, and report any suspicious activity or behavior. Remember, these rules and regulations are in place for everyone's safety and should be taken seriously to ensure that public buildings can serve their intended purpose efficiently and effectively.

Maintain cleanliness: Dispose all trash properly and keep areas tidy using designated waste bins. Visitors play a key role in maintaining cleanliness in public buildings.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Here are some ways that visitors can contribute to maintaining cleanliness:

1. Dispose of trash properly: Visitors should dispose of trash in designated bins and not leave litter on the floor or other surfaces

2. Keep restrooms clean: Visitors should be mindful of their use of restrooms and make sure to leave them in a clean and useable state for the next person. This includes flushing toilets, washing hands, and properly disposing of hygiene products in designated bins.

LEGAL & INSTITUTIONAL POLICY FRAMEWORK

This framework is in line with the Implementation of National Building Codes which requires building surveys every 5 years and maintenance plans for all new federal public building structures, It also establishes a centralized system for the maintenance of public buildings and assets across all MDAs ensuring that:

i. Maintenance is carried out according to uniform national standards.

ii. Major maintenance works are supervised by FPAM to ensure quality, transparency, and accountability.

iii. Maintenance staff across MDAs are trained and certified in asset management protocols.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Report issues: reporting damage in public buildings is crucial for ensuring public safety and proper maintenance of public facilities.

-Inform authorities of any damage.

1. Identify the location and type of damage: such as broken windows, cracks, leaks, etc. If possible, take pictures to help provide a better understanding of the damage.

2. Determine the responsible authority: it could be the public facility management.

3. Contact the responsible authority: contact the responsible authority via phone, email, or website.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

4. Report the damage: provide accurate information about the location and type of damage. If you do not hear back from the responsible authority within a reasonable timeframe, follow up with them to ensure the issue is being addressed.

5. Follow up:

-Timely report of maintenance needs to appropriate authority: is necessary for ensuring the safety, cost-effectiveness, and sustainability of public facilities/assets.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

1	**Right Use: Proper Disposal of Waste** **Disposing of trash in designated bins located throughout the public building, including offices, restrooms, and common areas.**	1	**Wrong Use: Proper Disposal of Waste** **Throwing litter on the floor, leaving trash in inappropriate places such as hallways, or placing waste next to bins instead of inside them.**
2	Right Use: Cleanliness in Restrooms Using public restrooms responsibly by flushing toilets after use, washing hands, and disposing of tissues or paper towels in the trash bins provided.	2	Wrong Use: Cleanliness in Restrooms Leaving toilets unflushed, throwing tissues or other waste on the floor, or blocking sinks or drains by improper disposal of items.
3	Right Use: Keeping Common Areas Clean Ensuring that meeting rooms, waiting areas, and other shared spaces are left clean after use by removing personal items, food, or trash.	3	Wrong Use: Keeping Common Areas Clean Leaving food wrappers, spills, or other personal items in shared areas, which can create an unsanitary and unpleasant environment for others.
4	Right Use: Avoiding Spills or Stains Cleaning up spills immediately or notifying maintenance staff to prevent accidents or damage, especially in areas with high foot traffic.	4	Wrong Use: Avoiding Spills or Stains Ignoring spills, which can cause stains, slippery floors, or damage to furniture and property, putting others at risk of slipping and injury.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

5	**Right Use: Maintaining Office Desks and Personal Spaces** **Keeping personal workspaces and desks clean and organized, with minimal clutter, and disposing of food waste or papers regularly.**	5	**Wrong Use: Maintaining Office Desks and Personal Spaces** **Allowing food waste, paperwork, or other clutter to accumulate in personal spaces, leading to unsanitary conditions or pests.**
6	Right Use: Properly Using Recycling Bins (if available) Sorting recyclables like paper, plastic, and glass into designated recycling bins where available.	6	Wrong Use: Properly Using Recycling Bins (if available) Dumping non-recyclable items into recycling bins or ignoring waste sorting systems entirely, which can contaminate recyclable materials.
7	Right Use: Reporting Cleanliness Issues Reporting broken equipment (like leaking faucets), clogged toilets, or overflowing trash bins to building management or maintenance staff for quick action.	7	Wrong Use: Reporting Cleanliness Issues Ignoring cleanliness issues, such as damaged facilities or overflowing bins, which can worsen hygiene problems over time.
8	Right Use: Avoiding Graffiti or Vandalism Treating walls, furniture, and other surfaces with respect by avoiding drawing, scratching, or defacing public property.	8	Wrong Use: Avoiding Graffiti or Vandalism Engaging in graffiti, vandalism, or damaging property, which not only spoils the appearance of the building but also incurs repair costs.
9	Right Use: Cleanliness After Events or Meetings Ensuring that any rooms used for meetings or events are cleaned up afterward by properly disposing of food, drinks, or materials used.	9	Wrong Use: Cleanliness After Events or Meetings Leaving event materials, food, and trash behind, expecting cleaning staff to handle large messes that could have easily been prevented.
10	Right Use: Personal Hygiene in Public Spaces Observing personal hygiene by washing hands regularly, especially after using the restroom or handling food, to prevent the spread of germs.	10	Wrong Use: Personal Hygiene in Public Spaces Neglecting personal hygiene practices, such as not washing hands or leaving personal hygiene products like tissues or wrappers in public spaces.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Follow capacity limits: is necessary for ensuring public safety, regulatory compliance, comfort and convenience, resource management, and equal access to public facilities.

-Adhere to any stated occupancy limits in the facilities such as office spaces, lifts, car parks etc.

Here are the reasons why this is important:

1. Safety: Adhering to the limits helps to manage and prevent overcrowding in public spaces.

2. Comfort and convenience: This is especially important in enclosed spaces like elevators, where overcrowding can cause discomfort and distress.

3. Efficient resource management: This helps prevent the waste of these resources and ensure that everyone has fair access to them.

4. Legal compliance: Occupancy limits are often established by laws and regulations, which require that each facility adheres to a maximum number of occupants. Failing to comply with the occupancy limits can lead to legal consequences.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Surveillance, Safety and Security. These measures can help prevent crimes such as burglary, theft, and assault, as well as reduce the risk of accidents and emergencies. Effective surveillance, safety and security measures can promote a sense of security in the community and help maintain public order.

Surveillance

-Follow safety guidelines to ensure your well-being.

-Non unauthorized access outside office hours.

-Provision of cameras, CCTV and other security gadgets.

-Strict adherence to ensuring well-being of other users.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Do's and Don'ts for Security, Surveillance and Safety

Do's:

1. Install security cameras and alarms in the building.
2. Train security guards and staff to monitor and report suspicious activities.
3. Conduct regular safety drills and provide training to occupants of the building.
4. Keep the building entrance and exit points well-lit and visible.
5. Have an emergency response plan in place.
6. Regularly check and maintain fire safety equipment.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Safety

-Ensuring speed limits and speed bumps,

-Indiscriminate parking

-Provision and maintenance of firefighting equipment.

-Compulsory and mandatory Health Safety Environment training drills for all civil servants.

Security

-Enhancing perimeter fencing with electrical wires

-Securing entry and exit points and security checks on all offices.

-Cordoning off unauthorized entries and exits

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Don'ts:

1. Don't allow unauthorized access to the building.

2. Don't ignore suspicious activities or threats.

3. Don't leave doors or windows unlocked or propped open.

4. Don't ignore safety hazards such as loose wires, slippery floors, etc.

5. Don't leave valuables unsecured or unattended.

6. Don't rely solely on technology for safety and security measures.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

4. Analyze the audit data and develop a report: A report is developed with recommendations on energy-efficient upgrades, retrofits, and improvements.

5. Implement the recommendations: After developing the report, it's essential to prioritize the recommendations and develop a plan to implement the recommended upgrades.

6. Monitor and track energy savings: it's crucial to track and monitor energy consumption over time to determine if the implemented measures are achieving their intended results.

Here are the correct and incorrect practices regarding the use of electrical fittings and appliances by civil servants in Nigerian public buildings:

Energy use and audit:

Implementing an energy audit in a public building involves several steps:

1. Determine the building's energy goals and objectives: The objectives can range from reducing energy costs, improving efficiency, reducing carbon footprint, and increasing occupant comfort.

2. Identify the scope of the audit: Determine which areas of the building will be audited and plan the audit schedule. A comprehensive energy audit examines the building envelope, lighting systems, HVAC systems, electrical systems, and water usage.

3. Conduct the audit: The auditor should perform an on-site inspection to collect data such as building size, occupancy patterns, operational hours, and existing energy systems. The data is then analyzed to identify energy-saving opportunities.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

	Right Usage of Electrical Fittings and Appliances:		Wrong Usage of Electrical Fittings and Appliances:
1	Proper Installation: - Electrical fittings (like switches, sockets, and light fixtures) should be professionally installed by licensed electricians. - Ensure that all appliances are connected to grounded outlets to prevent electrical hazards.	1	Overloading Circuits: - Plugging too many devices into one socket or extension cord can cause overheating and potentially lead to electrical fires. - Connecting high-power devices like heaters, refrigerators, and air conditioners to improper outlets.
3	Safe Appliance Use: - Switch off all electrical appliances like computers, fans, air conditioners, and lights when not in use, especially before leaving the office or at the close of work. - Use appliances within their designated capacity to avoid overloading circuits. This includes checking the voltage and wattage ratings before plugging in appliances.	3	Ignoring Damaged Equipment: - Using electrical appliances with exposed wires, broken plugs, or other visible damages increases the risk of electric shock or fire. - Ignoring the warning signs like sparks or burning smells from electrical fittings or appliances.
4	Use of Power Strips and Surge Protectors: - Use power strips with surge protectors to safeguard sensitive equipment like computers and printers from electrical surges. - Ensure that the power strips are not overloaded and are placed in well-ventilated areas.	4	Improper Use of Extension Cords: - Using makeshift connections or connecting multiple extension cords together (daisy-chaining) to extend reach. This can cause overheating and create a fire hazard. - Using extension cords permanently rather than seeking proper outlets.
5	No DIY Repairs: - Only certified technicians should carry out electrical repairs. Civil servants should report any electrical faults to the maintenance department rather than attempting to fix them themselves.	5	Water and Electricity: - Using electrical appliances near water sources or with wet hands increases the risk of electric shock. For example, using a coffee maker or electric kettle near a sink without taking precautions.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Waste management: implementing waste management in public buildings requires a comprehensive approach that involves conducting audits, developing waste management plans, setting up waste collection and segregation procedures, educating building occupants, and regularly monitoring the scheme. With a balanced approach, public buildings can reduce waste stream and promote sustainability.

-Recycling protocols are often part of public use

guidelines to promote good office environment.

Waste be disposed according to classification

e.g plastics, papers, iron, or wood separately.

Tiles are used for other things now.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

Other maintenance guidelines in the use of Public Facilities:

- Follow all posted signs and instructions: pay attention to posted signs, guidelines, and instructions.

- Use designated entrances and exits.

- Keep the area clean and free of clutter: Dispose of trash properly and help maintain clean environment.

- Use facilities as intended and don't tamper with building equipment.

- Respect other people's property and personal space.

- Report any suspicious activity or safety hazards to the appropriate authorities.

- Use emergency exits and fire extinguishers properly in case of an emergency.

- Respect others: Be considerate of fellow users, staff and maintenance personnel.

- Be mindful of noise levels: Refrain from loud conversations or activities that might disturb others.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

- Follow safety guidelines: Adhere to emergency procedures, fire drills, and evacuation routes.

- Do not damage or vandalize the building or any of its contents.

- Do not use the building for illegal activities.

- Do not smoke or use any prohibited substances.

- Do not block access to walkways, doors, or emergency exits.

- Do not disturb other people or cause unnecessary noise.

- Do not bring any dangerous or hazardous materials into the building.

- Do not take any belongings that don't belong to you.

USER'S GUIDELINES FOR ASSETS MAINTENANCE

- Do not ignore safety warnings: Pay attention to caution signs, warning labels, and safety instructions.

- Do not engage in unauthorized activities: Refrain from activities like loitering, soliciting, or unauthorized gatherings.

- Do not tamper with security measures: avoid interfering with security cameras alarms, or access control systems.

- Do not litter or create messes: Avoid leaving trash, spills, or other messes for others to clean

Here are examples of right and wrong behavior regarding eating in the office by civil servants:

USER'S GUIDELINES FOR ASSETS MAINTENANCE

	Right Behavior		Wrong Behavior
1	Eat in Designated Areas: Use break rooms, lunch areas, or personal spaces for meals instead of shared workspaces.	1	Eating at Shared Desks or Workstations: Consuming food at shared spaces or meeting areas where others are working.
2	Be Mindful of Others: Choose foods with minimal odors and noise to avoid disturbing colleagues.	2	Bringing Strong-Smelling Foods: Eating pungent foods that can disturb others in the office with strong odors.
3	Clean Up After Yourself: Dispose of leftovers, wrappers, and containers properly and clean up any spills or crumbs.	3	Leaving Food Messes: Failing to clean up food spills, wrappers, or crumbs after eating, leaving the space dirty.
4	Take Breaks for Meals: Use appropriate break times to eat rather than consuming meals during work hours unless it's allowed.	4	Eating During Meetings or Calls: Consuming food while participating in meetings or on the phone, which can be distracting or unprofessional.
5	Consider Allergies: Be aware of any colleagues' food allergies and avoid bringing items that could trigger allergic reactions in shared spaces.	5	Using Shared Work Equipment for Food Prep: Using office equipment like printers or copiers as surfaces to place food, or using microwaves and fridges irresponsibly (e.g., leaving food to spoil).
6	Keep Workspaces Clean: If you must snack at your desk, ensure the area is kept clean and free of food-related messes.	6	Ignoring Colleagues' Allergies: Bringing allergenic foods to the office without regard for colleagues' sensitivities, such as peanuts or shellfish.
7	Use Personal Utensils and Dishware: Bring your own utensils, plates, or cups instead of using shared items, and wash them immediately after use.	7	Leaving Food in the Fridge Too Long: Keeping old or expired food in the shared office refrigerator, leading to bad smells or messes.

REPORTING PROTOCOL

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

REPORTING PROTOCOL

Step 1**: Initial Report** – MDA maintenance unit identifies major issue and submits a Maintenance Request Form via FPAM's online portal or official channel.

Step 2: **FPAM Assessment** – FPAM conducts inspection (onsite or digital verification) to evaluate the scale, cost, and urgency.

Step 3: **Approval & Funding** – FPAM approves, allocates budget (if centrally funded), or guides MDA on procurement.

Step 4: **Execution** – FPAM deploys specialized contractors/technical staff in collaboration with the MDA's internal unit.

Step 5: **Certification & Handover** – FPAM certifies work completion and updates the National Asset Maintenance Register.

ORGANISATIONAL ROLES AND RESPONSIBILITIES

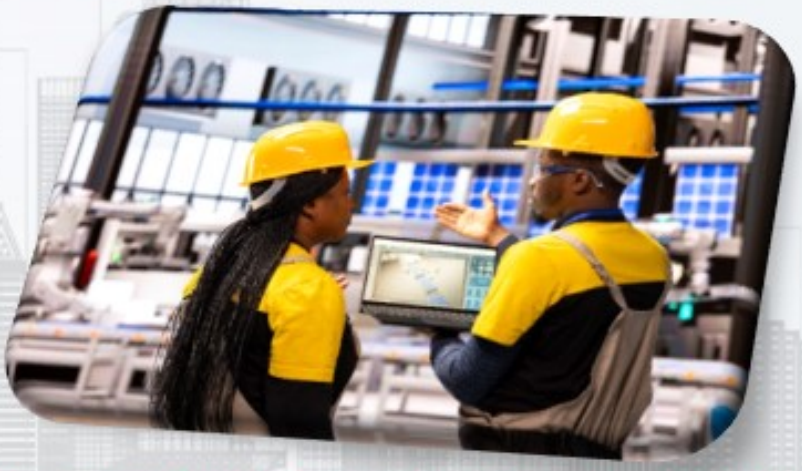

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

ORGANISATIONAL ROLES AND RESPONSIBILITIES

- Maintenance Departments of all MDAs are to be well trained by FPAM on protocols of maintaining federal government buildings and how to monitor maintenance tasks.

- FPAM (FMHUD): Sets standards, maintains national asset database, and coordinates capacity building across MDAs.

- External Contractors: Handle specialized services (HVAC, electrical, plumbing, landscaping).

MAINTENANCE PLANNING & STRATEGY

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

MAINTENANCE PLANNING & STRATEGY

- Preventive Maintenance: Regular routine checks on key systems.
- Condition Surveys: Every 5 years per National Building Codes.
- Reactive Maintenance: Emergency repairs; minimized through preventive measures.
- Lifecycle Costing: Decision-making on repair vs replacement.

All these must be supervised, coordinated and overseen by FPAM.

STANDARD OPERATING PROCEDURES

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

STANDARD OPERATING PROCEDURES (SOP)

Sample SOP Areas:

- HVAC servicing
- Fire safety checks
- Electrical inspections
- Plumbing and water systems
- Sanitation and landscaping
- Accessibility compliance
- Emergency evacuation procedures

Each SOP must include: frequency, responsible personnel, safety requirements, and reporting format.

TRAINING AND
CAPACITY
BUILDING
FPAM
DEPARTMENT
COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

TRAINING AND CAPACITY BUILDING

- FPAM shall develop a National Maintenance Training Program (NMTP) for MDA staff.
  - Training modules will include:
    * Preventive and corrective maintenance techniques.
    * Asset register management and reporting systems.
    * Safety, environmental, and sustainability standards.
    * Routine training for maintenance officers on latest technologies and safety standards (facility management software, IoT monitoring tools).
    * Workshops on sustainability, energy efficiency, and waste management.

- Training will be conducted quarterly, with certification for staff.

- Only FPAM-certified personnel will be authorized to handle public building maintenance.

BUDGETING & PROCUREMENT

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

BUDGETING AND PROCUREMENT

- Integrate maintenance budgets into all new projects.

- Use competitive procurement for outsourced services.

- Allocate funds for **preventive maintenance** (a proactive strategy that involves performing regular, scheduled inspections, servicing, and minor repairs on equipment and facilities to prevent major breakdowns, extend asset lifespan, and improve operational efficiency.) to reduce long-term costs.

SUSTAINABILITY& TECHNOLOGY INTEGRATION

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

SUSTAINABILITY AND TECHNOLOGY INTEGRATION

- Audits: Scheduled and surprise inspections.

  - KPIs: Response time, cost per asset, equipment downtime, compliance rate.

  - Reports: Quarterly and annual reports to FPAM (FMHUD).

- Use energy-efficient systems, solar power, and water-saving fixtures.

- Apply IoT sensors for real-time monitoring of building systems.

- Implement green building principles in renovations.

Site and Building Accessibility

1. Site Access & Circulation

○ Are **accessible pedestrian pathways** available for **PWD** from main roads and parking areas to the entrance? *

- ◯ Yes
- ◯ No

○ Are they free from obstructions and have non-slip surfaces? *

- ◯ Yes
- ◯ No

○ Are **ramps** provided at all public entrances? *

- ◯ Yes
- ◯ No

○ Are **ramps** of compliant slope (1:12 or less)? *

- ☐ Yes
- ☐ No

○ Is the **entrance doorway** wheelchair-accessible (minimum 850mm width)? *

- ◯ Yes
- ◯ No

○ Is there a **threshold that hinders wheelchair access**? *

- ◯ Yes
- ◯ No

2. Parking *

○ Are there **designated accessible parking bays** located within 50 metres of the main entrance?

- ◯ Yes
- ◯ No

APPENDIX B : COMPLIANCE FORMS FOR CERTIFICATION

1 **Maintenance Compliance Declaration Form**

Confirms that the MDA adheres to maintenance policy and standards. (Annually)

2 **Asset Inventory Declaration Form**

lists all maintainable assets with classification and status. (Annually/When updated)

3 **Preventive Maintenance Schedule Submission Form**

Details planned preventive maintenance activities by asset type. (Annually)

4 **Maintenance Activity Report Form**

Logs all maintenance activities (preventive and corrective), with outcomes. (Monthly/Quarterly)

5 **Maintenance Incident Report Form**

Records breakdowns, failures, or emergency repairs. (As needed)

APPENDIX B : COMPLIANCE FORMS FOR CERTIFICATION

11 **Health, Safety & Environmental (HSE) Compliance Checklist**

Ensures safety and environmental compliance in all maintenance works. (Quarterly/Per project)

12 **Audit Response & Correction Action Form**

Documents audit findings and steps taken to address them Per audit cycle

13 **Certification Request Submission Form**

Official request for certification/renewal based on compliance level. (As needed)

14 **Equipment Calibration/Inspection Certificate Submission**

Confirms calibration of critical equipment used in maintenance. (Annually/As scheduled)

15 **Disposal/Decommissioning Compliance Form**

Certifies proper disposal or decommissioning of assets. (Per occurrence)

APPENDIX B : COMPLIANCE FORMS FOR CERTIFICATION

6 **Maintenance Work Order Form**

Authorizes and tracks individual maintenance jobs. (Per activity)

7 **Service Provider Certification Compliance Form**

Verifies that third-party vendors are qualified and approved. (Annually/Per engagement)

8 **Asset Condition Assessment Form**

Documents physical condition and performance status of assets. (Biannually/Annually)

9 **Budget Allocation & Utilization Form**

Tracks maintenance budget approved vs spent. (Quarterly)

10 **Training & Capacity Building Compliance Form**

Tracks training completed by maintenance personnel. (Annually)

CONCLUSION

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE

CONCLUSION

The effective maintenance of public buildings and assets is essential for ensuring safety, operational efficiency, and long-term value for the nation's investments. This manual provides a comprehensive framework encompassing planning, implementation, compliance, and sustainability practices tailored to Nigeria's regulatory environment.

By adhering to the outlined procedures—ranging from preventive maintenance schedules to compliance audits and sustainability initiatives—MDAs and facility managers can minimize costly repairs, extend asset lifecycles, and enhance user satisfaction.

The integration of modern technologies, proper budgeting, continuous staff training, and strong institutional oversight will foster a culture of accountability and professionalism in public asset management. Ultimately, consistent application of these guidelines will help safeguard public infrastructure, reduce maintenance backlogs, and promote sustainable development of public facilities and assets across Nigeria.

"Preserving Public Assets for a Sustainable Future"

COMPLIANCE POLICY AND OPERATIONAL GUIDELINES FOR PUBLIC ASSETS MAINTENANCE
